OBJECTIVE

Final-year B.E. Computer Engineering Student with hands-on experience building end-to-end ML pipelines, LLM-based applications using LangChain and LangGraph, and FastAPI. Looking for an internship or entry-level role to apply practical knowledge of scikit-learn, PyTorch, and data analytics to solve real-world problems.

TECHNICAL SKILLS

Languages: Python, SQL, Java, PHP, HTML/CSS, C
Frameworks: LangChain, Streamlit, Flask, FastAPI, LangGraph
Libraries: Pandas, NumPy, Matplotlib, Seaborn, Sikit-learn
Developer Tools: Git, Github, Jupyter Notebook, Google Collab, Jira, Vercel, Docker, Visual Studio, MySQL Workbench, phpMyAdmin, Langsmith

EDUCATION

C.K. Pithawala College of Engineering and Technology <i>Affiliated to Gujarat Technological University (GTU)</i>	Bachelor of Engineering in Computer 2023-27
--	--

EXPERIENCE

AI-ML Advanced	2025 – 2026
-----------------------	-------------

Code Unnati by Edunet Foundation

- Built and evaluated ML models for prediction tasks using Python (scikit-learn)
- Learned core Deep Learning concepts including neural networks, activation functions, and model training
- Gained hands-on experience with real-world datasets and end-to-end model workflows
- Mastered end-to-end ML pipeline — data collection → preprocessing → model training → prediction
- Tools/Tech: Python, Pandas, NumPy, Matplotlib, Scikit-learn, pytorch, Power BI

Python Developer Intern	April 2025 - May 2025
--------------------------------	-----------------------

Codec Technologies India

- Explored core Python concepts including data structures, OOP, and scripting in a professional environment
- Gained exposure to Python development environment setup and basic debugging techniques
- Built professional communication skills while working within a structured development team

AI-ML Foundation	2024 – 2025
-------------------------	-------------

Code Unnati by Edunet Foundation

- Learned Python programming fundamentals and applied them to basic data analysis tasks
- Performed Exploratory Data Analysis (EDA) to understand data distributions, patterns, and insights
- Conducted data preprocessing tasks including handling missing values, duplicates, and data type conversions
- Used Python libraries such as Pandas and NumPy for data manipulation and cleaning
- Visualized data insights using Matplotlib and Seaborn to identify trends and patterns
- Gained hands-on exposure to end-to-end data analytics workflow from raw data to cleaned datasets

PROJECTS

FarmSevak—AI Crop Yield Prediction | *Python, Scikit-learn, Streamlit, ML, LangChain*

- Predicted crop yield, fertilizer, and pesticide requirements using Machine Learning
- Developed an interactive web application using Streamlit.
- Added multilingual support and data visualization dashboards.
- AI-powered farming recommendations and insights.

Quick Commerce Delivery Analytics and Optimization | *Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter*

- Analyzed quick-commerce delivery data to identify delivery patterns and operational inefficiencies
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) using Python.
- Generated actionable insights through visualizations to improve delivery performance and efficiency.
